PROBLEM SOLVER FOR EXTREME CASES

Heavily rusted or deformed connections are once again far too tight? Where normal tools can no longer help, our spiral flute extractors from GEDORE red can.

The GEDORE red spiral groove extractor set R68003010 has been specially developed for screws, nuts or bolts that can no longer be loosened using conventional tools or methods. Driven by a

1/2" ratchet, the innovative spiral profile cuts counter-clockwise into the defective bolt or nut head. The conically tapered spiral profile cuts itself into the screw connection independently, enabling the screw connection to be loosened. With the practical expulsion mandrel, the residual pieces are removed from the special nuts without much effort. The right sizes are easy to remove and clearly arranged in the practical plastic box.

SMALL , GREAT EFFECT

Reduced to the essentials and yet versatile.

The GEDORE red Mini Bit Ratchet R40150027 is the combination of high-quality design and incredible robustness for particularly fast screwing, even in tight working situations. Whenever screwing with a cordless screwdriver or conventional tool is not possible due to constricted installation space, the GEDORE red Mini Bit Ratchet comes into its own. The very low overall height is ideal for all particularly tight situa-

tions. Simple and fast switching is ensured by the reversing lever for left-hand and right-hand rotation. In addition to the direct holder for common 1/4" bits, the use of 1/4" sockets is possible via the drive adapter supplied. This makes the GEDORE red mini bit ratchet R40150027 an indispensable aid for professionals and DIY enthusiasts.

A KEY TO SUCCESS

Not the right wrench to hand or would you rather use pliers? The pliers wrench from GEDORE red combines various spanners and pliers in one tool - an all-rounder for professionals and DIY users.

The GEDORE red pliers wrench R28184010 is a hybrid of wrench and pliers and is therefore versatile in its use. Whether screwing, bending, holding, pressing or gripping, everything is possible with it. Due to its intelligent design, it replaces two complete sets of spanners (metric and imperial, 0-50 mm or 0-1.7/8"), as well as various pliers

with a span of 0-50 mm. It can be conveniently and practically steplessly adjusted to various wrench widths by means of the sliding mechanism and is also suitable as an alternative to the ratchet open-end wrench. The smooth and parallel jaws are gentle on surfaces such as chrome-plated or plastic workpieces. Its optimised pressing and clamping force with a tenfold transmission ratio enables maximised power transmission while conserving your own effort.

R2818 4010 PLIER WRENCH
